### Audio Packages

#### **Audio Package (A) for Small Venues – Amp and Passive Speakers**

)Medium Powered, 12 Channel Mixer/Amplifier, pair 12" full range speakers, wired microphone, stand, cables, connectors and power. Good for house parties or small club house events.

\$105.00 per day

#### **Audio Package (A+) for Small Venues –Medium Power Powered Speaker System**

)Single 10" Powered Speaker (600 Watts), 1 stand, wired microphone, stand, 3.5mm aux cable, power cable. This system has 2x Mic or line inputs, individual volume control for each input, and clip indicator. It has 400% more power than the (A) package. Great for back yard party, pavilion or meeting room.

\$115.00 per day

)Add a second 600 Watt Powered Speaker for just \$75.00 more. Great for gatherings of 75-100 people.

#### **Audio Package (B-1 ) for Small and Medium Venues – Combination Powered Mixer/Amplifier**

)High Power (500 Watt +/-), 6 Channel + 2 Powered Mixer, pair of 15" speakers on stands, wired microphone, stand, 3.4mm aux cable, cables, connectors and power

\$125.00 per day

(This system is a simpler, self-contained mixer and amplifier with 6 mic/line inputs and two additional inputs for MP3 players, aux or whatever) – same price, same power! It does a good job with crowds from 75-150 people, medium ball rooms and outdoor events.

#### **Audio Package (B-2) for Small and Medium Venues – Dedicated Amplifier and Mixer**

)High Power, 2 Channel Amplifier, Xenyx 802 8-Channel Mixer, pair of 15" speakers on stands, wired microphone, stand, cables, 3.5mm aux cable, connectors and power

\$125.00 per day

)Add basic equalizer \$10.00. Add 31 band EQ with feedback queuing \$15

(This system is rack mount gear. Simple to use, it has more settings for maximum sound control) It does a good job with crowds from 75-150 people, medium ball rooms and outdoor events.

#### **Audio Package (B-2+) High Power Powered Speaker System**

)Single QSC K12 1,000 watt powered speaker, speaker stand, wired microphone, cable and stand, 3.5mm aux cable and power cables. Great system for crowds up to 125. Has bass boost for extra whump!

\$145.00 per day

)Add a second QSC K12 powered speaker, stand and connecting cable for only \$100 additional. Events with 150 to 250 are great for a pair of K12s. Does a medium sized ball room and hits hard nearby on the dance floor.

**Audio Package (C) for Medium Venues**

Portable Rack Mount System with Two Amplifiers

1<sup>st</sup> Amp: High Power, 2 Channel Amplifier to run the tops/mains

2<sup>nd</sup> Amplifier for monitors or subwoofers

31 Band dual channel equalizer with feedback queuing cancellation system

Active crossover (b/l to EQ, b/l to amp or dedicated at the discretion of ProCo)

Xenyx 1202fx 12-Channel Mixer with effects

Power Conditioner,

(Optional: Behringer PMH2000 Combination Mixer/Amplifier/EQ/Effects/Main and Monitor amps instead of dual dedicated amps, mixer and Equalizer)

Pair of 15" high power speakers on stands, Choice of 2 monitors or 2 sub-woofers

Microphone wired, stand, cables, connectors and power

Passive speaker system for 150 – 300 people. Good for band in a club, DJ event, outdoors or in a large ball room.

\$200.00 per day

**Audio Package (Super C) for Medium Venues**

When you need more sound and extra thump, we've created the Super C package. It is the same as the Standard "Audio Package C" with three major upgrades. We upgrade the singles main speakers to 2,000 Watt Dual 15" Yamaha S215V speakers, we change the single Peavey 18" subwoofers rated at 400 watts for a pair of Yamaha SW218V double subwoofers, rated at 1,200 watts each! To drive the bigger subs, we have a new, high powered amp to match the power rating of those booming subwoofers. Here's the breakdown:

Rack mounted High Power, Two-channel amplifier to run the pair of double main speakers,

2<sup>nd</sup> Two-channel high power amplifier to drive the pair of double subwoofers

Power Conditioner

Dual Channel 31 Band equalizer with feedback queuing cancellation system

Active crossover (b/l to EQ, b/l to amp or dedicated at the discretion of ProCo),

Xenyx 1202fx 12-Channel Mixer with effects

Pair of Yamaha S215V high power, double 15" speakers

Pair of Yamaha SW218V double 18" subwoofers rated at 1,200 Watts Program (2,400 peak) each

Microphone wired, stand, cables, connectors and power

Passive speaker system for 150 – 300 people. Good for band in a club, DJ event, outdoors or in a large ball room. Massive, powerful bass from the SW218V subs. System requires two dedicated 20 Amp circuits – one for the subs and one for everything else!.

\$400.00 per day

### **Audio Package (D) for Bands, Concerts and Medium to Large Venues - Band/Concert Package**

Alright – are you ready to put on that concert? This is gonna make your band sound like you imagine! Start out with a trio of top brand amplifiers feed the monitors, the two-way speakers and the subs.

Okay, so what about those speakers? Two pairs of single 15", or one pair of dual 15" tower high-power, and a set of Peavey subwoofers with big, fat 18" Black Widow transducers pounding out the beat. And for the band, on stage a pair of Peavey custom monitors.

Then you have to mix it together. For that, we have Mackie DFX-12. It has plenty of XLR mic and ¼" line inputs and a wide variety of effects.

What kind of processing? Well, we're kind of believers in bringing the music to the people without a ton of heavy processing. So the rack gear comes with a Furman power conditioner, 2 Amplifiers for mains and subs and one Amplifier for monitors (model to be determined by Proco), Crossover System, and Dual 31 Band Equalizer.

As for microphones, we have a great assortment of Shure, Digital Reference, AKG wired mics, Sennheiser, Shure and other wireless units in handheld or lavalier. To really bring in the ambiance, we have a great set of border mics that we can add to the mix.

How about getting your sound from the stage to the rack and out to the speakers. We run a 12x3 Whirlwind Medusa snake that's 100' long. Or if necessary, our Rapco split 24x4 snake is available at additional cost. We have a pair of MAudio DI boxes with dual XLR/1/4" inputs and phantom power on both if needed. If your band doesn't need the long distance treatment, we can keep the rack onstage with an 8' Seismic 12x24 TRS/TS insert snake or a 25' 12x4 sub-snake.

Okay, so you're wondering about the cost. Now, it's tough to do fixed pricing on a package like this because there is a lot of customization. So what we've done is to create a great, base package that you could use to hold a concert. The base package will put the rack onstage or nearby so no audio snake will be required. After that, the additional touches will be able to give the band that extra flair that takes you from a good band to a great show!

So here's the basic package:

Rack	Power Conditioner/3 Amplifiers/ Combination Crossover/Dual 31 Band EQ/Feedback Destroyer
Mixer	Mackie DFX-12
Speakers	2x Peavey P118 Subwoofers, 2x Yamaha S215V High Powered Two-Way Dual 15"
Monitors	2x Peavey Custom Monitors (or equiv)
Microphones	2x Dynamic Microphones, wired, 2x Microphone stands
All Speaker, Monitor, microphone and power cables and connectors
